

# Cold Feelings

## Social Distortion

Uninvited feelings  
They come without warning and they stay too long  
I don't wanna feel, and if I run they'll be twice as strong  
I wait for a warning, I'm waiting for some kind of sign  
I try to separate , Try to separate my body from my mind  
I watch the clock as the second hand slowly goes strolling by  
I don't want to feel  
When a loved one's time comes to die  
I wait for a warning  
I'm waiting for some kind of sign  
I try to separate, try to separate my body from my mindCold feelings in the night  
You know, this feeling just ain't right  
And though I try I just can't hide  
Cold feelings in the nightYeah I got faith  
But sometimes fear it just weighs too much I don't want to feel  
Cold winds blowin' through me with an icy touch  
I wait for a warning, I'm waiting for some kind of sign  
I try to separate  
Try to separate my body from my mindCold feelings in the night  
You know, this feeling just ain't right  
And though I try I just can't hide  
Cold feelings in the nightCold feelings in the night  
You know, this feeling just ain't right  
And though I try I just can't hide  
Cold feelings in the night
