

# Build the Cities (Grabbitz Remix)

## Karma Fields

Miles of fire  
I'm losing ground  
And in the flashing  
My world comes crashing down I'm left to nowhere  
No place to hide  
Out in the open  
Like ashes in the sky I quit the illusion  
I'm moving on  
I'm moving on I let the flames light up the future  
Making empires of sound  
And see the tears become laughter  
You break the bridges  
To build the cities I let the flames light up the future  
Making empires of sound  
And see the tears become laughter  
You break the bridges  
To build the cities. I let the flames light up the future  
Making empires of sound  
And see the tears become laughter  
You break the bridges  
To build the cities. I let the flames light up the future  
Making empires of sound  
And she would chase what's coming after  
You break the bridges  
To build the cities. You burnt the bridges  
To build the cities.
