

# Back in the Day

## Nelson

We take it in at the movies  
You pitch us on tv  
All of you latest and greatest scams  
All your flavors of the weekSo you're confused by that retro sound  
And why it just keeps coming back around? (well cuz...)Back in the day  
We felt we could do the impossible  
Back in the day  
All our dreams were simply unstoppable  
Back in the dayYou went and lowered the standards  
And thought we never knew  
Well, you can hail shit a thousand times  
But that don't make it grooveThat's why you can't make us walk away  
from a soundtrack that still sounds great (because)Back in the day  
We were free to be anything we wanted to  
Back in the day  
We believed there was nothing that we couldn't do  
Before they taught us the fear to fly  
Before we sold out and ceased to try  
The radio was our saving grace  
Yeah, our heros showed us the way  
Back in the dayOur classic 45's are nothing less than time machines  
Press play to spin then climb right in  
and take that trip to what you needThey break us out - they see us through  
We're ten feet tall and bullet proof  
Wouldn't want to know what to do without those songs we play  
From back in the day(Solo)Back in the day  
When we were nothing short of incredible  
They broke us out - they got us through  
Made us ten feet tall and bullet proof  
Yeah, they made me like they made you  
those magic songs they play  
From back in the day
