

# Mystery

Brooke Fraser

I wanna get your words stuck in my head  
I wanna touch your soul with mine  
I want to always be, be by your lead  
Always I wanna know that you hung the stars in the sky  
So on lonely nights I would know your presence  
I wanna feel your love under my skin, down through my bones [Chorus]  
Your love endures forever  
Your love changes me  
Your love makes me whole, makes me better  
Your love endures I wanna feel the wind and know that you're near me  
And see in the seasons your mystery  
I wanna feel your love flow through my veins  
Pound through my heart  
[Chorus] I want to know how this could be  
Yet your love remains a mystery  
That's woven all the way  
That's woven all the way  
That's woven all the way through me [Chorus]
