Cold Canyon

Violent Femmes

Travel 'round the country Look out for what I can get Another blessed highway Hey mister you're gonna regret 'Cause you just reminded me of something I long to forget But no matter how much he drink or smoke My memory's still clear It hurts me dear It's sharp today like it was yesterday No I don't have much hope Just the other night I came Face to face with my past Came down like a lightning bolt Struck me with a flash I was praying all along That it would not last Oh stop it stop it stop it Y'know the last time you rang I nearly died I almost cried I put my pride in my pockets And said you gotta stay cool cool cool Y'know some things just gotta hang Oh Lord Lord Take me back I'm going back The long track So do yourself a favor And leave me if you please

And leave me if you please
I'm in a cold cold canyon
With a cold cold canyon breeze
Woke up in a strange room
And then I saw a door
I went right over and opened it
Though I'd never been there before
Started presiding over the meeting
The chairman said I had the floor
And when we adjourned everyone
was satisfied

We all got our money
Then went out where it was sunny
But it was kind of funny
To find out that I was such a dummy
But there's no place you can really hide
