Latin Escapades

Marcos Hernandez

I look into your brown eyes
And I see something compromised
Do you miss the fire and the heat we had at first
It made me so weak
It makes me so sad why had we let this thing die
So this cant be anything more than what it was
It was a dance, a fury from love
Now look here this is what you wanted
You broke me just because
So now I think you bought it
You caught me just so you could flaunt it
So baby come to me, let it be in this thing
Let me see if you can finish what you started
Tell me what is this I'm feeling
No, it's not an innocent weekend
This fantasy I had with you
Left me so alone and way too soon
I only wanted to fly away with you
And the full moon but its too late
You're gone adios, I'm left with pain
I'm through with these latin escapades
Did you wish for this like I did
I swear I fell in love
Does it give you pleasure teasing me in ways I've only dreamed of?
They say down south you'll have some fun
But all I got was a hit and run
It's my mistake but it's not my blame
We can't change whats been done
But when I look in your eyes

It's like a burst of warm sunshine
Girl you touch my soul
You know my heart's forever yours
And it's not like we didn't get along at all
It was just your love that you were faking
Roughed out, strung out, damn I hate it
Where is, where is, Where is your heart?
Tell me what is this I'm feeling
No, it's not an innocent weekend

This fantasy I had with you
Left me so alone and way too soon
I only wanted to fly away with you
And the full moon but its too late
You're gone adios, I'm left with pain
I'm through with these latin escapades
This thing is confusing my mind
And my nerves are all shot
And I'm tired of desiring what I'm just now finding is gone
And my heart is still screaming from heartache
It feels I might pop
God why the grief, tell me
Why did my love leave me
And why I can't make it all stop?
Tell me what is this I'm feeling
Tell me..
Ooh ooh ooh..
I'm through with these latin escapades
No more... no more..
I'm through with these latin escapades
