## Busta Rhymes

As we approach the current time frame of 1997  
With approximately two and a half years before the year 2000  
Repeatedly it has been reported that  
There will be a time soon approaching  
That a major disaster will be striking all levels of existence  
It has also been reported that this disastrous thing will be  
Approaching in the form of many, many as in squad  
Squad as in Flipmode Squad It has also been reported that everyone out of the many will strike  
But this particular motherfucker will strike with an unmeasurable blast  
That will fuck up everything within it's 360 degree radius  
Warning, prepare yourselves, store your food, stamp your paper  
Because when this motherfucker gets here  
It's about to get real fucked up for everyone and everything  
Everywhere! Well, Busta Rhymes  
Come on over here and let me talk to you son  
See now, Dolomite just got back from some shit that you about to be it  
Well, are you prepared? I hope you are prepared nigga  
'Cause you know this is album number two  
Yes more bitches than before  
There'll be more bitches, more and more and more  
More thirsty niggas, tryin' to get inside your shit  
Tryin' to throw your whole chemistry off  
Oh yes, there's gonna be a lot more money  
Yes a lot more money than before So son, don't you worry about none of that shit  
All you gotta do is just slap your dick  
In the mouth of these bitches that don't wanna act right  
And put a hot one in any motherfucker  
That wants to get in the way of this powerful shit right here  
Okay son, all right Busta enough of this shit talkin'  
Let's be on our way 'cause when disaster strikes  
There's gonna be a whole lot of motherfuckers pourin' in  
All right baby, let's go Yo, yo, yo, yo, yo, yo

Goin' out to all you motherfuckers across the globe

The niggas that live by the code of blood honor
