

Enough (Instrumental)

Avery Watts

(VERSE 1)

Go into the mind of the everyday grind, of the blind in the darkness
What do we find? Its a kind of confinement combined with pain,
Aligned by mankind and set to drain Stuck in a 9 to 5 to stay alive, living in a dive to barely survive
The whole time you try to get ahead,
Just to get a little peace before you get dead
Nuff said. Since your very birth, since your first breath on earth
It seems that life has been preordained
The order that it goes in? I'll explain:
Welcome to the world, go to school, get a job,
Get married, have a kid, be a dad, be a mom
Move along Don't think, don't stop, don't dream
Everything in the world is exactly how it seems Were told how to look, how to act, how to feel
Whats good, whats bad, whats fake, whats real
And when times get tough and its hard to deal
Just pick your poison and the pain will heal Got the blues? There's plenty of booze to choose,
Drugs to use, money to lose
You don't need to educate yourself on the truth,
That's already done
On the evening news Born to lead, but we act like cattle
Not anymore, get ready for the battle
Sick of it all? Then get one fist up and
Scream at the top of your lungs, hey (CHORUS)
That's enough
Throw those hands in the air
Get em up

Show we've had it up to here (VERSE 2)

Put your seatbelt on, prepare for a collision,
cause those who see with the eyes of the blind,
They lack vision Work, eat, sleep, wake, repeat
8 by 5 by countless weeks
Coffee, copies, floppies, faxes
Troubles, traffic, caskets, taxes FACT IS: Media sees, we find lifes answers in magazines
But why even read?
Everything that you need to believe is on a box we call the TV Don't think another thought
Stop, erase, forget what youve been taught.
You can cheat what you don't know - Lets break it on down:
Here we go! Your Brain? BAKE IT
Waist? FAKE IT

Don't have money for it? JUST TAKE IT
Your Hair? DYE IT
Courage? BUY IT
This will make it bigger over night, just try itGo into the world and make a name
Or just do it online, in a video game
You can stay inside until you scream
And live your life in front of a screen
Its sickeningWhat have we become?
Youre better than all that, dont play dumb
Its never too late to change all this stuff
Don't be afraid, stand up, say(CHORUS)(VERSE 3)
All this pissin, dissin, and bitchin got me on a mission
My ambition got you wishin you werent in the position
To be the personal ignition of my lyrical rage
Im out the cage, blowing off the ever-lovin chain
InsaneTo put it plain mein: Im Gone
Im the bane of all existence from this day on
If you want more - that man I be
Ill snatch your eyes out cha head before you get a chance to see
Who me?Thats right son, best believe it
cause unlike some when I say it I MEAN ITIm droppin tricky tongue tracks when I put out the wax
Now lets bring the hook back so everybody can relax
