Monster

Lucky Dube

I had a dream last night
One that will stay with me for a long time
One that will stay with me,
For as long as I live.
We were living in a world, there was no pain
We were living in the world there were no hungry people
Everyone was at peace with one another
There was a man in my dream
He told me he's from the future,
Coming to give something better x 3
Even though I that
Chorus
One monister dies another one comes alive.
I had a dream last night
It was my dream but I know it is a dream
Of a lot of people in the world
To be living in a world, with no homeless people

To be living in a world where little children
Don't have to die, because their parents are poor
When we came to this world
We were prepared to fight a battle.
But we found a war
When we came to this world,
We were prepared to fight demons
But we found the devil himself
There was a man in my dream
He told me he's here
To gimme something better
even though I know that,
Chorus
ONE MONISTER DIES, ANOTHER ONE COMES ALIVE.
Till fade.
