

Young Lady

N'Dambi

[Verse 1: Kid Cudi] In my head your smile appears clear
Wish it wasn't my imagination running away with a dream
Your eyes they tell it all called it
Hope you have a good heart and you're smart
You've got a good head on your shoulders,
That's what turns a nigga on, strong feelings that I have
You'll probably never, find out ever
I'll admire from afar, star
Keep doing all the good things you're doing
You got it going on, young lady
[Hook: Kid Cudi & Father John Misty](x4)
Jesus Christ, girl!
You got it goin on young lady
[Verse 2: Kid Cudi] How'd you get so fuckin cool?
Fools tryna spit at you daily

Price you pay cause you're hot
Has anyone told you that you're fresh as hell
And I dig the way you wear your hair too
It makes you look more mature
See I just wanna be a man and I think you can be the one to guide me,
But who the fuck am I kidding
Man you know they say I'm wild
But real people rarely come around if ever
You got it going on young lady
[Hook](x4)

[Verse 3: Kid Cudi] You turn a nigga on, these feelings I have
You'll find out never, unless you're clever
I admire from afar, star
Keep doing all the good things you're doing
You got it going on, young lady
[Hook](x4)
