

Scenester (Stripped)

Star Scream

Were the new, next and were the now
Cut to the chase and kill the sound
Thanks for the add girl, now make me proud
Swallow my pride and work the crowd And you know that Little miss Scenester
She always breaks my heart
But Ive never seen her smile
She always loves to, break my, break my heart Youre here to tell me all your lies
To make us feel alive, so we can shine
Wait, here it comes, Im growing a spine
Swallow my pride and that look in your eyes
Is mine And you know that Little miss Scenester
She always breaks my heart
But Ive never seen her smile
She always loves to, break my, break my heart I dont know the words, but Ill sing along
I dont know the words, but Ill sing along
I dont know the words, but Ill sing along Its unoriginal, its unoriginal, its unoriginal
And youre a little cynical, girl
Its unoriginal, its unoriginal, we know its unoriginal
So why so fucking cynical? And you know that Little miss Scenester
She always breaks my heart
But Ive never seen her smile
She always loves to, break my, break my heart
