Wandering Star

Lucero

the bands are done I should go home
all my friends left a long time ago
the girl serving drinks is the only one I know
I got no good place to go
it's a wandering star that lights my way tonight
on the city streets I call my home
it's a wandering star that lights my way tonight
I follow it 'till I am gone
the streetlights fade and disappear
I can see the stars that are out here
cross the bridge to the country roads
I'll follow that star wherever it goes
it's a wandering star that lights my way tonight
on the city streets I call my home
it's a wandering star that lights my way tonight
I follow it 'till I am gone
then I wander wherever it might roam
the luckiest star to call my own
and I wander 'till my hearts taken to rest
and my star falls from the sky
'cause falling stars are best
