

# Wandering Star

Lucero

the bands are done I should go home  
all my friends left a long time ago  
the girl serving drinks is the only one I know  
I got no good place to go  
it's a wandering star that lights my way tonight  
on the city streets I call my home  
it's a wandering star that lights my way tonight  
I follow it 'till I am gone  
the streetlights fade and disappear  
I can see the stars that are out here  
cross the bridge to the country roads  
I'll follow that star wherever it goes  
it's a wandering star that lights my way tonight  
on the city streets I call my home  
it's a wandering star that lights my way tonight  
I follow it 'till I am gone  
then I wander wherever it might roam  
the luckiest star to call my own  
and I wander 'till my hearts taken to rest  
and my star falls from the sky  
'cause falling stars are best
