

Will Love Grow

[Donna Lewis](#)

I wonder if you know
I wonder if you know
I wonder if you're feeling
The change I can't help myself, I'm falling
I'm going weaker at the knees
And I need to know you feel this way
I need to hear it please Will love grow in my garden
Will love grow in my garden Love is wild and precious
It's a flowering seed
It feels the air with madness
Love is all it needs A nourishment of tenderness
That blossoms to the touch
Flaunts a devastating beauty
That can haunt a life so much Will love grow in my garden
Will love grow in my garden By the gentlest of fingers
I will nurture care for you
Seek the sweetest shade of sunlight kissed
By early morning dew Keep a never ending vigil
Out of sight of all but one Will love grow in my garden
Will love grow in my garden Will love grow in my garden
Will love grow in my garden Will love grow in my garden
Will love grow in my garden Will love grow in my garden
Will love grow in my garden
