

Gravity

Mark Owen

Never had I imagined
Such a beautiful situation
Where everything I ever wanted is here
Is right here She is the rock I lean on
So good, it scares me
She's my condition
My solution, my way back every time When the daylight wakes me in some place
I don't wanna be, she's my gravity
When I'm out of position and nothing is working for me
She's my gravity, she brings me home, she's my gravity All at once
I'm in stitches
She makes me laugh so hard, I'm crying
I've never felt so animated before, ohh, no And when I'm losing myself
Feel her arms around me
My affirmation, my direction
My way back every time When the daylight wakes me in some place
I don't wanna be, she's my gravity
When I'm out of position and nothing is working for me
She's my gravity, she brings me home My calling, my way out
So, all things I'm about, my best side by design
So, always in my mind, my condition
My solution, my way back every time When the daylight wakes me in some place
I don't wanna be, she's my gravity
When I'm out of position and nothing is working for me
She's my gravity When the daylight wakes me in some place
I don't wanna be, she's my gravity
When I'm out of position and nothing is working for me
She's my gravity She brings me home
She brings me home, she's my gravity
