The Good Die Young

Great White

I was so blind led the life of a sinner
Living the lie was taking its toll
I looked in my eyes and saw hell's invitation
I realised that I gave up my soul

Always so blind can you see what we're doing?
A child has his innocence but never his day

If the good die young we're going to live forever
Heaven and earth couldn't stand in our way
If the good die young we're going to live forever
And that's the price we're going to pay

Searching for truth on a sea of deception
Find only the face of a child that's in pain
Another soul in a world of damnation
I see myself and the world ain't far behind

How do we stop the wheels of destruction?
The heaven we're taking is the hell that we're making

If the good die young we're going to live forever
Heaven and earth couldn't stand in our way
If the good die young we're going to live forever
And that's the price we're going to pay

Are we so blind? Can we see what we're doing?
The heaven you're taking is the hell that you're making

If the good die young we're going to live forever
Heaven and earth couldn't stand in our way
If the good die young we're going to live forever
And that's the price we're going to pay
If the good die young
