

# What

## Gin Blossoms

What

And give somebody all of my time  
That word, we'd never really cross that line  
My fault, I wonder why you never heard  
It's my fault, probably I never should  
All the time I've known you  
And maybe I shoulda told you what  
All the time I've known you  
And maybe I shoulda told you what

What

And give somebody all my time  
That thought it never really crossed my mind

My fault

I wonder if you're counting sheep

Yet if at all

Probably you're asleep

All the time I've known you  
And maybe I should have told you what  
All the time I've known you  
And maybe I should have told you what  
All the time I've known you  
And maybe I should have told you what

What

And give somebody all of my time  
That thought it never really crossed my mind

My fault

I wonder why you're never hurt

And if at all

Probably I never should have  
And all the time I've known you  
Maybe I should have told you

What...
