Long Way Home

Jukebox the Ghost

Seems like many years ago
It's strange how you can never know who's
Going to stay with you and who will leave
Do you remember me?
Do you remember me?We walk through the park at night
Gazing up at all the satellites
(Lights) in the city made it hard to see
Do you remember me?
Do you remember me?On that night, long ago
Walking down the road that we used to know
You said, "Let's take it slow"
Let's take the long way home
Let's take the long way homeOne day further down the road
With full grown children of your own
If I passed by you on a busy street,
Will you remember me?
Will you remember me?On that night, long ago
Walking down the road that we used to know
You said, "Let's take it slow"
Let's take the long way home
Let's take the long way homeOne day down the road you'll find
Everything you hid inside
Caught beneath the ocean,
Searching for a sign of lifeOne day down the road you'll find
Something that you kept inside
Caught beneath the ocean
A part of us is still aliveOne day down the road you'll find
Everything you hid insideOn that night, long ago
Walking down the road that we used to know
You said, "Let's take it slow"
Let's take the long way home
Let's take the long way home
