

I Still Love You

Bee Gees

Close your eyes, do what you wanna
Baby, how can I wait much longer
Make it hard to believe it happened to me
Morning comes too late tomorrow
All you lose is the dream you borrow
All you got is a soul that's born to be free
And cries to the wind waiting for you
My dream will find you someday
I stand beside my vision of you
And have you loving me
I still love you, ah
Though you're my imagination
You be there when we find salvation
Only then will there be no reason to hide
Stormy nights out in the heaven
I believe in the true forever
There's a bright new star when somebody dies
I cry to the wind waiting for you
Sweet love returning someday
The day you learn love happened to you
You will be here with me
I still love you, ah
I still love you, ah
I'll be waiting for you
Sweet love returning someday
The day you learn love happened to you
You will be here with me
I still love you, ah, I still love you, ah
I still love you, ah, I still love you, ah
I still love you, ah
