

All the Time

Cloud Nothings

[illegible]

It happens all the time
At least that's what they know
It happens all the time
At least that's what they know
It happens all the time
At least that's what they know
It happens all the time
At least that's what they know
It happens all the time
At least that's what they know
It happens all the time
At least that's what they know
It happens all the time
At least that's what they know
It happens all the time
At least that's what they know
