

# Uncover

Zarai»; Larsson

Nobody sees, nobody knows,  
We are a secret, can't be exposed.  
That's how it is, that's how it goes,  
Far from the others, close to each other. In the daylight, in the daylight,  
When the sun is shining,  
On the late night, on the late night,  
When the moon is blinding.  
In the plain sight, plain sight,  
Like stars in hiding,  
You and I burn on, on. Put two and together, forever will never change  
Two and together will never change  
Nobody sees, nobody knows  
We are a secret, can't be exposed  
That's how it is, that's how it goes  
Far from the others, close to each other  
That's when we uncover, cover, cover  
That's when we uncover, cover, cover My asylum, my asylum is in your arms  
When the world gives heavy burdens  
I can bear a thousand times  
On your shoulder, on your shoulder  
I can reach an endless sky  
Feels like paradise Put two and together, forever will never change  
Two and together will never change.  
Nobody sees, nobody knows  
We are a secret, can't be exposed  
That's how it is, that's how it goes  
Far from the others, close to each other  
That's when we uncover, cover, cover  
That's when we uncover, cover, cover We could build a universe right here,  
All the world could disappear,  
Wouldn't notice, wouldn't care  
We can build a universe right here  
The world could disappear,  
I just need you near Nobody sees, nobody knows,  
We are a secret, can't be exposed  
That's how it is (It is), that's how it goes (It goes)  
Far from the others, close to each other  
That's when we uncover, cover, cover  
That's when we uncover, cover, cover (Ooh yeah)

That's when we uncover
