We're Not Afraid (feat. Justin Pierre)

Sing It Loud

If I could say your name it wouldn't come to this
And if I know you're mine then it'll be alright
But if I stay the night then I'll never fix what I want to
What I want to, I want toI wanna know if there's a way that you could take my hand
With yours before I slip and fall and fall againWe're not afraid of where we're going
(No, no, no)
We're just afraid of where we've been
(No, no, no)If I could say your name, it wouldn't come to this
And if the timing's right, then we could be just fine
But like I said before, I know I'll never fix what I want to
What I want to, I want toIf you could find a way to wait then I could stall it
Come back down before I slip and fall and fall againWe're not afraid of where we're going
(No, no, no)
We're just afraid of where we've been
(No, no, no)If you could see what I see
You wouldn't try to mess with me
And though we've been here before
This time for real I'll say your name
And things will be just fineIf I could say your name, say your name, say your name
If I could fall asleep without you, without you, without you
If I could say your name, say your name, say your name
If I could fall asleep without you, without you, without youIf I could say your name, say your name, say your name
If I could fall asleep without you, without you, without you
If I could say your name, say your name, say your name
If I could fall asleep without you, without youWe're not afraid, we're not afraid
We're not afraid, we're not afraid
