Satellites

Embrace

As water laps my feet
Sharks surround me I sleep
You smile and line up your army
But my enemies can't get near meBecause I claimed victory
That day now I'm calm
I have seen in your eyes
How much you suffer in the darkWhere shining stars light the heaven
We satellites hope to reach
And my black water reflects them for meCome on lets make our move
They won't see a thing
That they can't see throughAnd shining stars light the heaven
We satellites hope to reach
And my black water reflects them for me for meWhere shining stars light the heaven
We satellites can't compete
And my black water reflects them for meAnd redemption will pour
And crashes to the floor
And a million cold thoughts
Won't stop you feeling warmBecause the luck that you bring
Conquers all these things
