

# Human Being

## Descendents

I can't change the fact  
That there's enough nukes in this place  
To kill the world one million times over  
We all sit back and accept it Just part of being alive  
Just part of being a human being Trip over the homeless on the way to the store  
We don't even notice anymore  
Just waiting for the Prez to fix it  
But his hands are tied just the same  
A part of being alive  
A part of being a human being
