Pulling You Down

TRUSTcompany

Breathe in again, feel the beating of your heart
As the world around you slowly comes apart
See under water as you live in yesterday
Feel tomorrow's moments slowly pull away
They pull away, tomorrow slips away, you pull
Wake up, we need you now
Lights out and it pulls you down
So we got to save you now
Wake up, we need you now
Lights out and it pulls you down
And there's only one way out
So we got to save you now
Breathe out again, shut the lids above your eyes
And feel your heart beat faster to know you're still alive
Slide under covers, let the world slow down tonight
To remind yourself you'll make it out alive
Make it out alive, make it out tonight, make it out
Wake up, we need you now
Lights out and it pulls you down
So we got to save you now
Wake up, we need you now

Lights out and it pulls you down
And there's only one way out
So we got to save you now
And it pulls you down
It pulls you down, pulls you down
We're slowing down
'Cause nothing lasts forever
As time runs out, we're stable now
Because nothing ever lasts forever
Wake up, we need you now
Lights out and it pulls you down
So we got to save you now
Wake up, we need you now
Lights out and it pulls you down
And there's only one way out
So we got to save you now
Wake up, lights out

Because we got to save you now
There's only one way out
Break these arms, we need you now
