The Animator

Kit Nolan

Prepare,
The miserable part is now over
I won't let you down when I finally have you around
Make sure,
You've packed all your dreams to bring with you
There's no way you'll fail, your success will be unveiled

...And of course, there'll be us
Stealing frames in between
The render's almost complete,
You animate me

(Guitar solo)

When I'm dull,
You make sure my life finds its color
You texture your painted expressions
To feel real

(Instrumental break)

(Draw me) You draw me in (x11)

Draw me in, you draw me in (x2)

...And of course, there'll be us
Stealing frames in between
The render's almost complete,
You animate me
