

# The Animator

[Kit Nolan](#)

Prepare,  
The miserable part is now over  
I won't let you down when I finally have you around  
Make sure,  
You've packed all your dreams to bring with you  
There's no way you'll fail, your success will be unveiled

...And of course, there'll be us  
Stealing frames in between  
The render's almost complete,  
You animate me

(Guitar solo)

When I'm dull,  
You make sure my life finds its color  
You texture your painted expressions  
To feel real

(Instrumental break)

(Draw me) You draw me in (x11)

Draw me in, you draw me in (x2)

...And of course, there'll be us  
Stealing frames in between  
The render's almost complete,  
You animate me
