Forces

The Bad Plus

Lost the plot
Without regard or thought
Never getting caught
Never your own
Endless threats
From a nervous wreck
Showing no regrets
Never alone
Forces, dark forces are everywhere
They won't stop
They won't stop till you're here
Sly remarks

A reaction starts
When things fall apart
Past any doubt
Well aware
A naive grudge to bear
A deadlocked affair
With our without
Forces, dark forces are everywhere
They won't stop
They won't stop till you're here
Don't save yourself for someone else
These things I say are meant to prove this weight I have will fall from view
