

The Chase

In Flames

The chase of wild one has to become
Figuring out where you need to be
Find the pulse into with all you see
It's in front of you Every other way
Leeds to the same old great wall Head first with the speed of light
I won't be showing songs of me In vain, sometime
I'll find right where i belong
A life that was meant to be
Have faith in me! Sometimes it's hard to believe
The stones remain
I should just force right through
I guess it's for a reason we're waiting in line at the station Head first with the speed of light
I won't be showing songs of me In vain, sometime
I'll find right where i belong (right where i belong)
A life that was meant to be
Have faith in me, Have faith in me! Head first with the speed of light
I won't be showing songs of me In vain, sometime
I'll find right where i belong (right where)
A life that was meant to be
Have faith in me
Have faith in me
Have faith in me
