

Change the System

Rebelution

Who's gonna change up the system?
Who's gonna change up the system?
We're gonna change up the system
A man don't know, if a man don't show
It takes more than some bravery for the situation grows,
Communicate so vital, the whole world at an idle,
Lose all your fronts and put down every rifle,
It's time for us to see,
Time for you and me,
Too much greed, while so many bleed,
Now that it's been said, put that shit to bed,
Break it off, shake it off, take a hit, light it up, take a hit
You say you got a feeling to change up the system,
Oh we can light the scene, be justice of the peace, create an unseen,
Come use your head, we got ten times the power than some gunshots leaving some dead,
Listen up, ready gotta make some shit right,
We're standing up against the ones who take away lives,
I mean it like, who wants to live a life, hiding from a war between some 45's tryin to survive,
Common now,
How many times you seen a glock used in self-defense?
Well than less than 15 percent, so repossess their guns
Do you really wanna own one for the sake of it?
Think about black on black crime, what you think of that?
Poor people struggle everyday, and the rich get richer, what a fucked up state,
So no more hate,
Now let us rise up to the top,
We'll spread a little love instead of seeing gunshots
Think quick, don't sit, come get, that's it, make it, commit yourself for a little bit, no no no
Oh my, time flies, short life, no cry, one time, kiss the fucking violence goodbye, whoa oh
You say you gotta feelin' to change up the system whoa whoa whoa
You say you're gonna put down your weapon of destruction
You say you gotta feelin' to change up the system whoa whoa whoa
You say you're gonna put down your weapon of destruction
Who's gonna change up the system?
Who's gonna change up the system?
We're gonna change up the system
Well I'll be singing till the day I die,
Using words, not the gun, cuz the words show the wise,
On the side, it's the bullet I despise,

Forget your fucking clip, stop!
Shouldn't even be there to buy,
How many heads have got their morals tied up in a knot?
They forgot firing shots means a lot, naughty naught,
Killin' some is ending plots,
And the dreams of children growing up are cut short from the gat,
Do you really wanna own one for the sake of it?
Think about PEACE, don't you know there's a hope for that,
And while we struggle everyday, remember that,
LOVE starts with a passion to pursue fighting hate,
You say you gotta feelin' to change up the system whoa whoa whoa
You say you're gonna put down your weapon of destruction
You say you gotta feelin' to change up the system whoa whoa whoa
You say you're gonna put down your weapon of destruction
Who's gonna change up the system?
Who's gonna change up the system?
Who's gonna change up the system
A man don't know if a man don't show,
It takes more than some bravery for the situation grows,
Communicate so vital, the whole world at an idle,
Lose all your fronts and put down every rifle,
It's time for us to see,
Time for you and me,
Too much greed, while so many bleed,
Now that it's been said, put that shit to bed,
Break it off, shake it off, take a hit, light it up, take a hit
You say you gotta feelin' to change up the system whoa whoa whoa
You say you're gonna put down your weapon of destruction
You say you gotta feelin' to change up the system whoa whoa whoa
You say you're gonna put down your weapon of destruction
Who's gonna change up the system?
Who's gonna change up the system?
Who's gonna change it up?
