

Better Living Through Chemistry

Adema

One little request changes life for your best interest,
no need for self-control while doctors line their pockets
One for your pain and one for your mind rely and I'm
not addicted it's fine
One to lose weight and make you look right one day there'll be one for these lies
Of course feeling numb here
(of course feeling numb here) habit for me
No matter what's wrong will set you free, better living through chemistry
Prescriptions for it if you need relief. Better living through chemistry
Every place I turn my eye, new drug
marketing line
The sure for everything is just around the corner, this dealer wears a nametag here to fill our order
One for your
pain and one for your mind rely and I'm not addicted it's fine
One to lose weight and make you look right one day there'll be one for these lies
Of course feeling numb here
(of course feeling numb here) habit for me
No matter what's wrong will set you free, better living through chemistry
Prescriptions for it if you need relief. Better living through chemistry.
Get your life under control.
Get your life under control.
Patients are paychecks just looking for the kick back,
Money's the motive and corruption is the tool of their trade
Greed is taking over the hollow heart of healthcare,
No longer taking chances, they've given up on us
We are the only ones that can end epidemics like this (Stand
up!)
Now that you know
Now that you know
No matter what's wrong they'll set you free, better living through chemistry
Prescriptions for it if you need relief, better living through chemistry
We are the only ones that can end
epidemics like this, better living through chemistry
We are the only ones that can end epidemics like this, better living through chemistry
(Stand up!) Now that you
know
(Stand up!) Get you life under control
(stand up!) Now that you know, Get your life under con
