

# Sky High

## Lasgo

First light show like you're next to me  
Feels like just where I want to be, you know  
Been searching all of my life  
Till you came around  
I swear I'll never let go of this love without...

You light me up like stars in the night  
And when we kiss it's so right  
You lift me up, I feel I can fly  
Your loving takes me sky high

You light me up like stars in the night  
And when we kiss it's so right  
You lift me up, I feel I can fly  
Your loving takes me sky high

So tired of living all alone  
You came and made your heart my home, you know  
You swept me right off my feet with your angel eyes  
Boy, every second with you is a paradise

You light me up like stars in the night  
And when we kiss it's so right  
You lift me up, I feel I can fly  
Your loving takes me sky high

You light me up like stars in the night  
And when we kiss it's so right  
You lift me up, I feel I can fly
