Walk Upright

Seeed

My love let we be together
And make a change for the better
Outside is an easy weather
But inside I feel so cold.

Whoa yeah how sweet tastes your lover
Something new you must discover
Shades of brutality
But still I walk upright

I surf the world with "Dia" through the red sea
In double sense bubble plans someone calls me from far away
Let me stay to hard my back for the day after.
Where camels walk the sunspeed I ride the deserts heat
Bringing ancient water overdubbed impressions lost in the way back in time.

Laughter filled the air before you decided
Dust is on you chair since we've been divided
Cold is my face in the morning when I get up late
After a dreamless night.

My love let we be together
And make a change for the better
Outside is an easy weather
But inside I feel so cold.

Whoa yeah how sweet tastes your lover
Something new you must discover
Shades of brutality
But still I walk upright.

You the only girl that make mi blood boil up hot.
My heart skip a beat, no want to stay inna spot.
A girl like you me get once in a life
You're leaving down here, on a dusty chair.

Everything is oh so grey the night don't want to become a day
Where are you? OH
I always think of times we had before.

Come let us stay together

Laughter filled the air before you decided
Dust is on you chair since we've been divided
Cold is my face in the morning when I get up late
After a dreamless night.

My love let we be together
And make a change for the better
Outside is an easy weather
But inside I feel so cold

Whoa yeah how sweet tastes your lover
Something new you must discover
Shades of brutality
But still I walk upright, walk upright..
