Desperate Man

Tindersticks

She knows, what happens when I'm without her How this ring itches on my finger Does she let me go to help me remember Remember how I came in? I was desperate then Remember what I am without her And that's a desperate manHow far I go, when I'm without her How fast and how long that slide, I'll always take that ride It itches on my finger, helps me remember Remember how I came in I was desperate then Remember what I am without her And that's a desperate man, yeahShe knows, what happens when I'm without her She sees the problem, she understands the irony When I'm slumped there in that seat And slobbering of how much I love herHey, bartender, let me tell you about when I walked in I was desperate then If I could find my way back to loving her I'm a desperate man, yeah, I'm a desperate man, yeah
