Joy

Ishyua

Power this is all your power
this is all your power on this level that you cant not even find
cry stop now those cries give it up to the joy on the universe and all thats around of us

but you can now go and find theres a great chance to survive on this land
but you should now realize theres a great joy on this life

hey joy hey joy theres a great joy in a jungle that you can go and find
hey joy hey joy theres a bass on this universe and you get it for life
