

# It Had to Be You (Acoustic)

## Motion City Soundtrack

I get lost, messed up and bored  
When I'm alone too long  
I can't sleep, function and eat  
When I'm not with someone  
Late last fall she ended it all  
And moved to who knows where  
Just like that she vanished and packed  
And never even called  
Do you feel a certain sense of synergy  
Between yourself and me?  
A kind of macabre and somber  
Wonder twin type of harmony  
What if it was you?  
You that I needed all along  
I felt like a fool  
Kicking and screaming  
And pretending we were wrong  
Let's get wrecked on Pop-Tarts and sex  
And see the Taj Mahal  
Let's save birds from Prince William Sound  
And skateboard through the mall  
Let's fight crime with mangoes and limes  
And join the PGA  
Let's win big with every spin  
But hurry I can't wait  
Do you spend a fortune on those late night  
Prepaid television scams  
In search of the perfect blender  
Steak knife and nonstick frying pan?  
What if it was you?  
You that I needed all along  
I felt like a fool  
Thinking we were completely wrong  
It seemed like a dream  
A beautiful scream  
That echoed forever  
And made us not afraid to feel a thing  
And after it ends  
We'll try to be friends  
They say that what doesn't kill us  
Makes us who we are  
All this time and every thing's changed  
But I still feel the same  
All good things eventually end  
And get washed down the drain  
What a disaster it would be  
If you discovered that I cared  
A little too much for friends  
But not enough to share  
What if it was you?  
You that I needed all along

I felt like a fool  
Now that I'm sure that I was wrong  
It had to be you  
It had to be you  
I knew it was you
