Lab Rats

RBK

God bless the police invisible marines
Your state isn't safe and niether is me
We're the rats of experiment
Suburban laboratore
We're the mice without legs
Tagged at birthLaboratory rats
This is a labThe scientist he's your god
The scientist till we're goneThe science fair's continual
Aliens are having fun
They let us go a bit in
Our own time zoneScience bless computer chips
God bless your families
Science bless your little pets
It's time to come clean
