

# Close to the Edge

## Barren Cross

And then it came at the end of all time  
A time where nothing grows old, nothing dies  
It's a place where you can fly all around, heaven is found  
Can't you see the bright lightning in sound? Close to the edge, I was running out of time  
Close to the edge, but now there's peace of mind And now I look to the north and I see in front of me  
A shining blue light in the distance, oh I see  
A castle of ivory gold, look out, behold  
It almost never became my home, no, no Close to the edge, I was running out of time  
Close to the edge, walking on a thin, thin line Close to the edge, the spotlight shines on you now  
Close to the edge, you better make your choice soon now  
Close to the edge, your heart's the key that makes you free  
Close to the edge, as the world blinds your eyes, God can make you see  
You're close to the edge Don't burn out the light, it ain't burning bright  
Son, can't you see where you're going, you're close to the edge Oh, well I know you cry, you don't wanna die,  
So take what I've found, and you'll be miles and miles from the edge  
You're close to the edge On the edge of the world there's only one rhyme  
But you ain't got the time to know what it means  
You're dead, you're dead  
Don't figure it out 'cause you're dead, oh you're dead  
On the edge of the world Close to the edge  
Close to the edge  
Close to the edge  
...
