

Tall Cans Hold Hands

Told Slant

With your sunglasses on and your feet in the creek
I would not go around here if you were not here with me
And I'm assembled this way in the space here, don't take
There's no legible south I can evoke when you go away
Life was not bad with tall cans and hold hands
You're my best friend and I need you, do you know that?
With your overalls on and your feet in the creek
An assemblage of moments of when you wanted me
And I evoked you today, with my feet in the creek
As if you'd feel something shake you, as if you'd think of me
And say
Life was not bad with tall cans and hold hands
You're my best friend and I need you, do you know that?
