

# The Key

L.I.S

Out here there's a hole in the sky  
Doors open to the other side  
I saw a two headed dog fighting over a bone  
Black haired woman turned into crows  
I gotta take a step back and think this through  
I gotta know it's true  
I gotta know that I'm living in a dream  
Is this what it seems? Gotta know anyone believes  
How did I get lost? What's the final cost?  
Could you please help me find the key?  
Out here under the willow tree  
Down deep is where you'll find the key  
I've been here once before  
Maybe in a dream thylacines play tambourine  
I gotta take a step back and think this through  
I gotta know it's true  
I gotta know that I'm living in a dream  
Is this what it seems? Gotta know anyone believes  
How did I get lost? What's the final cost?  
Could you please help me find the key?  
Out here the saying goes off with the lights  
And on with the show  
Once it's dark the children play  
They all join hands and dance around the grave  
I gotta know that I'm living in a dream  
Is this what it seems? Gotta know anyone believes  
How did I get lost? What's the final cost?  
Could you please help me find the key, find the key?
