

One For The Body

Wildlife

We'll be waiting when the rapture comes
And you and I will lay there arm in arm
Seems things just got a little bit hard
So far away from who we know we are
So take it, take it, shut you eyes and say
The pill will make the terror go away One for the body, one for the mind
Just give me a little bit
One for the body, one for the mind
Just give me a little bit
One for the body, one for the mind
One for the body, one for the mind
Just give me a little bit Each of us is just a time machine
Stuck in love with all our memories
Seems things just got a little bit hard
So far away from who we know we are
So take it, take it, shut you eyes and say
A pill to make the terror go away Angel of loneliness,
Come to destroy us,
Angel of loneliness,
Come to destroy us again.
