

Body Language

[Marlon Roudette](#)

Like the way you hears you can seal my lips without a word
Maybe I could learn, I want you to take me to your world And I can barely stand it
When you use your body language
Got me out f this advantage
When you use your body language Shadows dance around I can feel this falling to the ground
And prison by your touch I don't ever need a way out But I can barely stand it
When you use your body language
You me out f this advantage
When you use your body language
There could be no lies when you talking with your eyes
There will be no compromise, you know I'm all your tonight Like the way you hears you can seal my lips
without a word
Maybe I could learn, I want you to take me to your world I can barely stand it
When you use your body language
Got me out f this advantage
When you use your body language
I can barely stand it
When you use your body language
Got me out f this advantage
When you use your body language
