Feel Love

Ben Harper

Ooh, yeah, stood in the dark
With our hands over each others hearts
And we didn't waste a word
Embrace his love undeserved
When you feel love
You remind me I can feel love
We sleep and share the same dream, love
When we feel love
I've given all, I've given in
Given out and back again
Now that we're in from the cold
Our days are made to glow
Love, you remind me I can feel love
We sleep and share the same dream, love
When we feel love
What has been lived can't be changed
But what we have lost we can still
Can still be reclaimed
And I won't, I won't let you down
When you feel love
You remind me I can feel love
We sleep and share the same dream, love
When we feel love
When you feel love
When we feel love
As we feel love, feel love
When we feel love
