

Baby Doll

Girlicious

Yeah, yeah

Yeah, yeah

Yeah, yeah I need that, spend that, drop it like a Cadillac

I need that, spend that, drop it like a Cadillac

I need that, spend that, drop it like a Cadillac

I need that, spend that, drop it I know why you're here, you know what I'm here for

You're breakin' the bridges to save an earful

Wanna lay me down slow, let's make this clear though

I'm worth it, invest it, I'll let you nurse it, caress it, oh Uh, confess it, you know you wanna see me undressing

No pressure, uh, you good right now but you could do better Cause I need it all, now is that so hard?

I'm your baby doll and I get what I want

Cause I need it all, the furs and the stones

I'm your baby doll and that's what I want Need that, spend a stack, drop it like a Cadillac

Things that bling, that ring on my finger, yeah And what I need aint gotta be material

That car, that house aint what makes me pull near to you

But if you buy me that car I don't only wanna ride

Boy I want you, keep me running all night, put me in overdrive Uh, confess it, you know you wanna see me undressing

No pressure, uh, you good right now but you could do better Cause I need it all, now is that so hard?

I'm your baby doll and I get what I want

Cause I need it all, the furs and the stones

I'm your baby doll and that's what I want Need that, spend a stack, drop it like a Cadillac

Things that bling, that ring on my finger, yeah

Need that, spend a stack, drop it like a Cadillac

Things that bling, that ring on my finger, yeah Are you man enough to give me what I want?

So shine it up and jump off, jump off

Im so good it hurts but Im gon make it worth

Im worth every penny, baby dont you forget it Cause I need it all, now is that so hard?

I'm your baby doll and I get what I want

Cause I need it all, the furs and the stones

I'm your baby doll and that's what I want Cause I need it all, now is that so hard?

I'm your baby doll and I get what I want

Cause I need it all, the furs and the stones

I'm your baby doll and that's what I want Need that, spend a stack, drop it like a Cadillac

Things that bling, that ring on my finger, yeah

Need that, spend a stack, drop it like a Cadillac

Things that bling, that ring on my finger, yeah
