Dystopia

Iced Earth

Enter the nightmare
This future does implode
A techno city-state
A prison, nothing moreRounded up like cattle
You're forced into the trains
Nothing that you've ever known
Will bring you so much painIf you try to resist me
You'll find me inhumane
But if you just submit
You'll live your life a slave
You'll love your servitude
We'll medicate your pain
With our technology
We'll always keep you safeMicro-chipped like dogs
Their thoughts are not their own
All that's left of human kind
Is now in their controlPlanned out through centuries
Patient and contrived
Played on man's naivety
Gullible and blindIf you try to resist me
You'll find me inhumane
But if you just submit
You'll live your life a slave
You'll love your servitude
We'll medicate your pain
With our technology
We'll always keep you safeThe nightmare unfolds before my eyes
I will resist 'til the end of time
A spirit born free has to break these chains
We're lost, we must find our way
We must find our way
We'll find our wayThey say that you're a danger
To everything that's pure
There are too many of you
They're offering the cureSwift extermination
If you refuse the game
Arrested development
Your vaccinated fateIf you try to resist me
You'll find me inhumane

But if you just submit
You'll live your life a slave
You'll love your servitude
We'll medicate your pain
With our technology
We'll always keep you safeThe nightmare unfolds before my eyes
I will resist 'til the end of time
A spirit born free has to break these chains
We're lost, we must find our wayThe nightmare unfolds before my eyes
I will resist 'til the end of time
A spirit born free has to break these chains
We're lost, we must find our way
We must find our way
We'll find our way
