

I Remember

[Joe Modifica](#)

On a clear night in September - I remember - I remember
In the moon light on the beach that night by the bonfire light,
Love at first sight, I surrender - never forget her The times we had - the memories made
That summer love, never fade
I remember - never forget her We'll I remember these nights and days
The sand and ocean - the sun on your face
And I remember the color of your eyes
And the light of your hair When I saw you - standing there - with smiling pretty eyes and long flowing hair
Well I knew the as I still know now
That summertime romance the best I found
I remember - your lips so tender Flying high and burning bright
That summer love - gone in a night
I remember - never forget her Well I remember those nights and days
The sand and the ocean the sun on your face
And I remember the salt and the air
The color of your eyes - the light in your hair On a clear night in September
I remember, I remember
