

Her Diary's Black Pages (Remastered)

Rage

In her diary's black pages
The stories end in dark sadness
And what she never dared to say
Is in her diary's black pages She's a magician, she's got second sight
Sends her mind wandering into the night
Into the future, stories untold
Tragedies and accidents, she always knows In her diary's black pages
The stories end in dark sadness
And what she never dared to say
Is in her diary's black pages, no Brother kills brother, family fights
Fire burns babies while the mother sleeps tight
Whatever she's dreaming, it's gonna be real
She couldn't help it when she writes what she's seen She's a magician, she's got second sight
Sends her mind wandering into the night
Into the future, stories untold
Tragedies and accidents, she always knows In her diary's black pages
The stories end in dark sadness
And what she never dared to say
Is in her diary's black pages She's a magician, she's got second sight
Sends her mind wandering into the night
Into the future, stories untold
Tragedies and accidents, she always knows
She always knows
