I wanna tell you but I know you know
Sometimes the things you want are never quite enough
If I had my choice I'd choose you everytime
But Girl your wishes, they won't make you my.. new Girl.
So fall in luck do I deserve you? Maybe not, but I just can't let go
When you hold me girl..ooh I must surrender, cause a love like your is so sweet and strong, baby I've got to have it all
Chorus
All Day and All nite (Background)
Suga we don't wanna rush it now
Let's take it nice and slow
All Day and All nite (Background)
Can we get up on the feeling Girl?
Ohh woo
I want your love (Background)
I want you, ya know?
First it started with a simple kiss
Your hand in mine, no we didn't waste no time.
Like Ice in Water, we were made for each other yeah
Are you thirsty now? Shall we wait a while?

Now I'm feeling like a child at play.
Just close your eyes baby let me lead the way

I got my love light on
and it's shining for you girl
I can't do without you
What I'm gone do to..do to to you c'mon
Chorus
All Day and All nite (Background)
Suga we don't wanna rush it now
Let's take it nice and slow
All Day and All nite (Background)
Can we get up on the feeling Girl?
