

# Hoedown

## Aaron Copland

Got a gig I'd like you to know, we're leaving here tonight  
We're going just to sing our song and everything's all right  
And we'll be missing you but that's for me to care  
Gotta go, better tell you now, 'cause something's in the air  
Don't care if I do it or die, that don't mean a thing  
Yes indeed that's all we need so everybody, sing!

Count it out, but into yourself, love that's the thing  
It's there just if you don't know, it makes your body sing  
I'm talkin' about me, myself, and all the world around  
Wanna see you take you by the hand and do some mess around  
Don't have to know, don't have to know, lovin' takes you back  
Gets about and I wanna shout, so everybody sing!

We'll get you, we'll get you everyday  
Get you, we'll get you every way  
Get you, when nighttime comes along  
Get you, we'll get you with our song
