

# Blink

## Rosie Ribbons

Dont smoke dont drink  
all i did was think  
fucking life life hard times  
trying to become such a drama be loved  
trying to amuse myself  
beats and waves will take me to my grave  
and when ill go there  
i know that i will be alone  
cus' i been spotted blooted  
many many times before  
ease and pleased the least for my shive  
i will be flying above the hate and the love  
and if you see me honey  
you had better blink your eyes  
strange how night blow in to one  
run with me and have some fun  
drup some wine to blow up mind  
misses the way to inspire the time  
travels comes eleven fields  
i show you mine if you show me yours  
walking out of this circle  
step by step im learning alon  
that i can conquere my demons  
just need to remember my home  
thers is no need to be frightened  
we here are allready are dead  
get us on ending vibration  
danger lots only in my head  
come break through with me  
such wonders terrified the soul  
its real no need to question

knowledge infeltrate the whole  
lightning striks in the darkes places  
more im learning powers  
threaten we have to make choices  
lizards try to tell us wich one  
strange how night blow in to one  
run with me and have some fun

drup some wine to blow up mind  
misses the way to inspire the time  
travels comes eleven fields  
i show you mine if you show me yours  
strange how night blow in to one  
run with me and have some fun  
drup some wine to blow up mind  
misses the way to inspire the time  
travels comes eleven fields  
i show you mine if you show me yours  
dont smoke dont drink  
all i did was think  
fucking life life hard times  
trying to become such a drama be loved  
trying to amuse myself  
its outrage we are tachmachine  
i go there and when i go there  
i know that i will be alon  
cus' i been spotted blooted  
meanly menay times before  
ease and pleased the least for my shive  
i will be flying above the hate and the love  
and if you see me honey  
you had better blink your eyes
